Report of the activity

Blue Gold or water is the most important resource on the face of earth, because it's very much important for the survival of all life forms on earth. Now a days the pressure over clean and good drinking water is getting reduced. Water Treatment plants in and around the world make sure that the water is available for all humans as clean as possible and free of pathogens. The visit to Water treatment plant @ Aluva helps the students to understand all the activities that is taking place in a WTP.

Outcome of the activity
