

REPORT OF THE PROGRAMME CONDUCTED

Dept. of
Sree Sankara College Kalady

Title of the activity	World Nature Conservation Day Celebration
Date and Time	02/12/1999
Resource person	Department of Biotechnology, Sree Sankara College, Kaladt
Nature of activity	College
Type of Activity	,
Linkage Activity	
Convener	
Number of participants	100

Report of the activity

The Department of Biotechnology at Sree Sankara College commemorated "World Nature Day" on October 3rd, 2023, with a significant event aimed at raising awareness about the importance of medicinal plants, biodiversity conservation, and the preservation of endangered species. The celebration was marked by a collective effort to plant medicinal plants in the garden, facilitated by the active participation of students, faculty, and non-teaching staff members.

- 1. Plantation Drive:** The cornerstone of the celebration was a plantation drive where students, guided by faculty members, brought various medicinal plants from their homes and nearby localities. This participatory approach not only fostered a sense of community but also encouraged students to actively engage with nature and understand its significance in our lives.
- 2. Recognition of Medicinal Plants:** Through the process of planting, students were able to recognize different medicinal plants and learn about their distinct properties and uses. This hands on experience provided invaluable insights into the rich biodiversity of our environment and underscored the importance of preserving these natural resources for future generations.
- 3. Understanding Conservation:** The event served as an educational platform for students to understand the critical role of conservation in safeguarding endangered medicinal plants and promoting biodiversity. Discussions led by faculty members highlighted the environmental challenges facing these plants and emphasized the need for collective action to protect and preserve them.
- 4. Promoting Awareness:** Beyond the confines of the department, the celebration of World Nature Day also aimed to raise awareness among the broader campus community about the significance of nature conservation and sustainable practices. Through informative posters, presentations, and interactive sessions, participants were encouraged to reflect on their relationship with the environment and explore ways to contribute to its protection.

The Department of Biotechnology's celebration of World Nature Day was a resounding success, thanks to the enthusiastic participation and collaboration of students, faculty, and staff. By fostering a deeper appreciation for medicinal plants, biodiversity conservation, and environmental stewardship, the event served as a catalyst for positive change within the academic community and beyond. As we look towards the future, it is imperative that we continue to nurture our connection with nature and work together to ensure the well-being of our planet for generations to come.

Outcome of the activity

The outcome of the Programme
The event saw enthusiastic participation from students, faculty, and staff, fostering a sense of community and shared responsibility for environmental stewardship. Participants gained practical knowledge about medicinal plants and biodiversity conservation, enhancing their understanding of environmental issues.
The celebration of World Nature Day raised awareness among the campus community about the importance of nature conservation and sustainable practices. The Department of Biotechnology's commemoration of World Nature Day was a resounding success, driven by the collaborative efforts of students, faculty, and non-teaching staff. By fostering a deeper appreciation for nature and environmental stewardship, the event catalyzed positive change within the academic community and beyond. As we move forward, it is essential to sustain the momentum generated by this event and continue advocating for the well-being of our planet.
